### **DETAILED ACTION**

1. Applicant's Proposed Amendment filed 03/17/2005 has been reviewed and placed of record in the file.

#### ***Allowable Subject Matter***

2. Claims 1 and 3-21 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or render obvious a memory device having all (respectively) exclusive limitations as recited in claims 1, 10, and 16, comprising a structure, either whose second end acts as a drain region, or which functions as a channel region for the memory device; a plurality of dielectric layers, at least one of which acts as a floating gate electrode or charge storage electrode for the memory device, and which are formed around a portion of the structure; and a conductive layer, which could function as a control gate for the memory device, formed over the plurality of dielectric layers; the structure having a cylindrical shape, and a top portion of the second end or a top portion of the structure not contacting any of the plurality of the dielectric layers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
